

RENTAL APPLICATION & AGREEMENT

CARE & MAINTENANCE OF INSTRUMENTS

1. Hold your instrument by the neck as much as possible. This will keep fingerprints off the varnish and reduce the need for cleaning. A stable atmosphere of 40% to 60% humidity is best for your instrument and bow.
2. Wipe the rosin and perspiration off your instrument, bow stick and strings with the micro-fiber cloth provided after playing to avoid rosin build-up. In addition, do not use any type of polish on the instrument as it also creates a wax build-up.
3. Do not touch the bow hair and the strings between the bridge and the fingerboard. This will keep your hair and strings oil free so the bow will grab the strings better.
4. Tuning with the pegs causes large changes in the pitch and can result in the strings breaking. We recommend letting your teacher tune your instrument for you until you are able to match pitch.
